**Report on the Online Certificate Course on
Banking & Finance**

Organized by

Department of Commerce (Hindi Shift)

Banwarilal Bhalotia College, Asansol

As per the growing need of the UG and PG level students in Accounting and Finance stream, a 30-days Online Certificate Course on the topic “Banking & Finance” was introduced by the Department of Commerce (Hindi Shift), Banwarilal Bhalotia College, Asansol, West Bengal, India. The objective of this course was to give a practical exposure to the students on banking operations by both the academic and professional experts in this field. The curriculum for this course was thoroughly designed by the Course Co-ordinator Mr. Santanu Mallick, Assistant Professor in Department of Mathematics, Banwarilal Bhalotia College. The Brochure for this course (attached with this Report) was circulated well in advance. Many students were highly enthusiastic about this course and a total of 129 people from all over India have registered. A dedicated WhatsApp Group (<https://chat.whatsapp.com/GaPYl8c2QFd3eVoQRLPsiT>) was also created for further communication regarding this Course. This Certificate Course was inaugurated by Prof. Amitava Basu, Principal, Banwarilal Bhalotia College, Asansol through a virtual session on 10th January, 2022. Md Arif Akhter, Head and Assistant Professor, Department of Commerce (Hindi Shift), Banwarilal Bhalotia College greeted the audience by his Welcome Address. Sessions by General Managers of Reserve Bank of India, former Bank Managers, Assistant General Managers of Reserve Bank of India, Senior Manager of SBI Life had further enriched the course by enlightening the participants on areas like FinTech, Cheque Truncated System (CTS Clearing), Loan disbursement procedures, different financial products offered by banks etc. The course had received some very positive overall feedbacks though some UG and PG level students have requested to offer this course at more basic level as some topics of this course were considered to be much advanced for them. A large amount of assignment problems as well as numerous homework problems were given to the students as hand-in exercises and they submitted their answers through Google Form or WhatsApp. After the 30 days duration of this course, a Final Test was conducted through Online Assignment on 25th February, 2022. A total of 37 participants have passed this Test and received Online Certificates through an Online Valedictory Program on 26th February, 2022. In the valedictory session Mr. Satyajit Deb, General Manager of Reserve Bank of India was present. He shared his prolonged experience in the field banking with the participants. The other details regarding this Certificate Course are hereby attached along with this Report.

Cheque Truncation System

- ▶ Clearing Timings for CTS standard instruments for Chennai Banker Clearing house (CBCH)
- ▶ The CTS is capable of supporting different types of clearing. Each type of clearing will have a separate clearing window known as clearing session. Initially there will be one presentation clearing session and one corresponding return clearing session per day.

The clearing timings for these sessions are as follows: Session No	Session Type	Weekdays (2nd & 4th Saturday holiday)	Timing
1	Presentation	Monday - Saturday	15:30 hours to 19:30 hours
3	Return	Monday - Saturday	12:00 hours to 14:30 hours

- ▶ CHI for Outward Presentment
- ▶ The Outward presentment deals with accepting forward presentment data and images from the banks image capture system and **exchanging them at the CHI.**
- ▶ **CHI performs the following steps during the outward presentment workflow.**
 - Receive cheque MICR data in xml file and corresponding cheque image data in a binary file from image based capture unit that meets the standards stipulated by RBI/NPCI.
 - Register the files received in step i and sort the file drawee bank wise and send to all drawee Bank s for clearing, side by side CHI also send the Multi Net Settlement Batch file to CHI.

Photosynthesis Issues
Water pollution from substances can disrupt photosynthesis in aquatic plants. Photosynthesis is the process in which plants use the energy from sunlight to produce sugar, or glucose, by converting carbon dioxide into carbohydrates. However, when water is polluted, the capacity of water to dissolve gases such as carbon dioxide is negatively affected. Because plants that grow in water or in water-logged soil – also called hydrophytes – depend on photosynthesis for their survival, any interference in the photosynthetic process can kill them.

Soil Problems
Polluted water in the ground actually washes the essential nutrients plants need out of the soil. Water pollution makes the soil acidic and negatively affects the solubility of nutrient ions, such as iron, magnesium, potassium and calcium ions. As a result, water removes these nutrients more quickly from the soil and sends them into streams and lakes. Calcium and magnesium in particular are critical for proper plant growth. Iron helps plants to create the pigment chlorophyll – which is necessary for food formation – while potassium helps plants to use water. Without these nutrients, plants become more susceptible to drought, fungal infections and insects. Water pollution also leaves large amounts of aluminum in the soil, which can be harmful to plants.
